***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-7, drawn to an apparatus for pallet inspection and repair.

Group II, claim(s) 8-11, drawn to a method for automated inspection and repair of a pallet.

Group III, claim(s) 12-18, drawn to software for the inspection and repair of a pallet.

2. The inventions listed as Groups I, II and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the technical feature of analysis software in Group I is not required in Group II and the technical feature of an inspection station connected to a computer in Group I is not required in Group III; the technical features of collecting three-dimensional coordinate data and of retrieving a set of criteria from a database based on the pallet design in Group II is not required in Group I, and the technical feature of moving the pallet relative to an inspection station in Group II is not required in Group III; The technical feature of collecting three-dimensional data and converting the collected data into a two-dimensional representation of the pallet in Group III is not required in Group I, and the technical feature of an analysis software in Group III is not required in Group II.

3. A telephone call was made to Mr. Michael Taylor on July 2, 2010 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

Art Unit: 3726

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
